

ACID SOLUTION FOR STONE SURFACES WITH AN ANTIQUING EFFECT

DESCRIPTION

AC PIÙ is a mixture of acids suitable for washing and treating rough stone, granite, sandstone, marble, etc.; the product is particularly suitable for the treatment of surfaces in porphyry and natural stone, removing the processing residues present on the support and highlight, at the same time, the natural colors. AC PIÙ is the ideal product for the removal of whitish residues cement and sealant processing, encrustations limestone and saline efflorescence. The product is suitable for the treatment of limestone surfaces to be aged, thanks to its ability to remove the whitening caused by sandblasting or disc cutting. AC PIÙ is used in shipbuilding in general: construction companies, split stone layers, end-of-site cleaning companies, surface treaters.

YIELD

The yield varies from 2 to 20 m² of surface with 1 kg of product.

APPLICATION

The method of use and the dilution of the product vary depending on the type of work to be carried out:

- For the removal of limescale residues pour AC PIÙ, diluted in water, directly on the surface evenly, by means of a spray, or in small quantities with a brush. Leave it act until the reaction is completely exhausted (about 5/10 minutes), at this point rinse with running water. This stage is followed by a neutralization wash with a solution of CIBERMAC diluted to 10% in water.
- For cleaning construction site dirt, sealant residues and more, after the laying of stones and marble rough, we recommend to rub with scrubbing machine or by hand with a brush using a solution of AC PIÙ diluted with 10 parts of water. Repeat if necessary.

ALWAYS CARRY OUT TESTS BEFORE USE

Anyone, before use, needs to know the characteristics of our products by reading the label affixed to each package, the technical data sheet and the safety data sheet compliant with Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and adjustments) and of Regulation (EU) 2015/830, or eventually by contacting us directly. However, we recommend to strictly follow the instructions given or received.

We also recommend to carry out a preventive sampling to detect any unexpected results with respect to the method of application or the quality of the result. Keep the package well sealed and out of the reach of children. Aerate the working environment well during and also after the application of the product.

Do not eat or drink when using this product.

RECOMMENDATIONS

Make a first cleaning of the surface to be treated for remove any non-adherent residues and then moisten the surface with water before treatment with AC PIÙ. For an eventual surface protection treatment use CS 51. The product is aggressive in contact with the skin, it is recommended to wear protective clothing and, if necessary, take off those wet from the product. The product cannot stand freezing, store it in well-closed and well-protected places, at a temperature not lower than 10 °C.

NOTE

Our indications and technical advice, both given by voice or in writing, refer to our personal best knowledge and do not include any guarantee against third parties.

We kindly invite you to adapt our products to your needs and working conditions: methods of use and processing techniques are exclusively under the responsibility of the buyer.

As far as we are concerned, we guarantee constant quality in our supplies within our general conditions of sale. Should you verify our liability for any type of damage, the liability is limited solely and exclusively to the value of the goods supplied by us and used by you.
