

NEUTRAL ANTI-STAIN PROTECTIVE TREATMENT FOR TERRACOTTA SURFACES

DESCRIPTION

CIBERCOTTO is a solvent-based impregnating agent with a total absorption, breathable, which does not form surface films. It is ideal for stain protection of terracotta floors, laid internally and externally, and it possesses a good resistance to U.V.A. rays and acid rain. CIBERCOTTO protects against the use of staining substances, food and trampling dirt, it prevents the formation of mosses, blackening from atmospheric dirt and smog. When applied on interior floors, it is possible to employ self-polishing finishing products, such as MIX PLUS or other products containing waxes.

CIBERCOTTO can be applied to any type of terracotta: rustic, handcraft, new or recycled, with raw or polished finish, traditional Tuscan terracotta.

YIELD

The yield varies from 4 to 10 m² of surface with 1 L of product.

APPLICATION

CIBERCOTTO can be applied on floors, stairs, covers, etc. by spray, brush, roller, or manually, with a cotton cloth, on the clean and dry surface, rather than by personal methods honed by professionals in their operational experiences, which vary also depending on the type of support and finish you want to get.

ALWAYS CARRY OUT TESTS BEFORE USE

Anyone, before use, needs to know the characteristics of our products by reading the label affixed to each package, the technical data sheet and the safety data sheet compliant with Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and adjustments) and of Regulation (EU) 2015/830, or eventually by contacting us directly. However, we recommend to strictly follow the instructions given or received.

We also recommend to carry out a preventive sampling to detect any unexpected results with respect to the method of application or the quality of the result. Keep the package well sealed and out of the reach of children. Aerate the working environment well during and also after the application of the product.

Do not eat or drink when using this product.

RECOMMENDATIONS

For the application of finishing products, wait until CIBERCOTTO is perfectly dry, therefore not before 24 hours. The product cannot stand freezing, store it in well-closed and well-protected places, at a temperature not lower than 10 °C.

Always protect yourself with mask, gloves and protective clothing.

NOTE

Our indications and technical advice, both given by voice or in writing, refer to our personal best knowledge and do not include any guarantee against third parties.

We kindly invite you to adapt our products to your needs and working conditions: methods of use and processing techniques are exclusively under the responsibility of the buyer.

As far as we are concerned, we guarantee constant quality in our supplies within our general conditions of sale. Should you verify our liability for any type of damage, the liability is limited solely and exclusively to the value of the goods supplied by us and used by you.
