

NON-FILMING-FORMING WATERPROOFING PRODUCT FOR TERRACES

DESCRIPTION

KLINK is a product based on resins and waxes diluted in suitable solvents. Its composition allows a capillary penetration in the micro-cracks and cracks of the tile coverings on terraces. These surfaces are subject to adjustments that cause the creation of micro-cracks in which water can infiltrate as it can cause serious damage to the structure of the terraces. It's a product that doesn't aesthetically alter the appearance of the support on which it is applied and has a good duration over time. Ideal for porcelain stoneware and ceramics, it is also effective for terraces with terracotta floors and rough stone floors, coverings of swimming pools and mosaic showers.

YIELD

The yield varies from 8 to 20 m² of surface with 1 L of product.

APPLICATION

Apply KLINK on clean and dry surfaces. A first hand is sufficient to penetrate as far as possible into the support; we may recommend a second one in the case of absorbent materials.

The application by brush is recommended. After a few hours, after drying, you will notice a slight residue due to the excess product; its elimination can be made using SOLV X, a slow evaporating solvent.

Between the first application and the second one, it is recommended to wait about 24 hours.

ALWAYS CARRY OUT TESTS BEFORE USE

Anyone, before use, needs to know the characteristics of our products by reading the label affixed to each package, the technical data sheet and the safety data sheet compliant with Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and adjustments) and of Regulation (EU) 2015/830, or eventually by contacting us directly. However, we recommend to strictly follow the instructions given or received.

We also recommend to carry out a preventive sampling to detect any unexpected results with respect to the method of application or the quality of the result. Keep the package well sealed and out of the reach of children. Aerate the working environment well during and also after the application of the product.

Do not eat or drink when using this product.

RECOMMENDATIONS

For routine washing use a neutral detergent such as CIBERNET. The product cannot stand freezing, store it in well-closed and well-protected places, at a temperature not lower than 10 °C. Always protect yourself with mask, gloves and protective clothing.

NOTE

Our indications and technical advice, both given by voice or in writing, refer to our personal best knowledge and do not include any guarantee against third parties.

We kindly invite you to adapt our products to your needs and working conditions: methods of use and processing techniques are exclusively under the responsibility of the buyer.

As far as we are concerned, we guarantee constant quality in our supplies within our general conditions of sale. Should you verify our liability for any type of damage, the liability is limited solely and exclusively to the value of the goods supplied by us and used by you.
